

# MANIFOLD BOX

## APPLICATIONS

Device for stabilizing the parameters of the operation ground source to heat pump.

## WHAT IS THE MANIFOLD BOX?

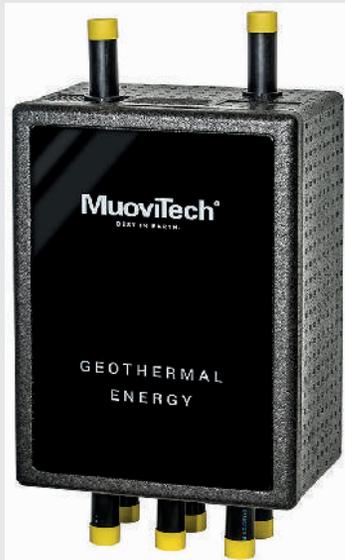

Manifold Box to use outside / inside the building. Heat-insulated casing of polypropylene foam EEP. Equipped with flowmeters DN25 with adjustable from 2-16 l/min or 10-40 l/min. Dedicated to small installations.

## PROPERTIES

Fully-equipped manifold box. Ready to connect 2 - 3 ground exchangers. Equipped with 1" (DN25) ball valves on its supply (flow) part and linear flowmetres 1" (DN25) on return part. Available in configurations with Angle flowmeters with self-cleaning flow scale and temperature measurement on the main pipe.

MATERIAL: Polypropylene foam EEP  
SIZE: 600x400x260mm

Possibility configurations of manifold box according individual project

### PRODUCT:

2-ports manifold box

3-ports manifold box
